ONTARIO POPULATION STATISTICS - 1968

DEPARTMENT OF MUNICIPAL AFFAIRS

MINISTER **W. DARCY McKEOUGH**

DEPUTY MINISTER **W. H. PALMER**

COMMUNITY PLANNING BRANCH

DIRECTOR **D. F. TAYLOR**

INTRODUCTION

This publication is designed to provide, in a single volume, population data for Ontario municipalities for the period 1941 to 1968. Municipalities examining their own communities and planning for their future development should find it useful as a source of basic data on trends and change.

The major source of data is the Census of Canada for the census years 1941 to 1966. More recent data, for the years 1964 to 1968, is from assessment records. As these are not strictly comparable, some points of comparison are included.

Population figures are used in planning not only to indicate current size and trends but to calculate change and to compare changes in different municipalities. To assist in this, tables are included showing numerical change and rates of change during various time periods from 1951 to 1966.

Changes within the municipality are evident from the numerical population data. Comparisons between municipalities for a specific time period (or between different time periods for a specific municipality) can be made from the annual rates of change.

There are many factors that reflect the importance of a municipality in relation to its surrounding area and population is one of these. Accordingly, one of the table series shows the population of each municipality as a percentage of the population of the county, region or district in which it is located.

From time to time, annexations and amalgamations change the boundaries of municipalities, which are the geographic areas used for recording the population statistics. Where such changes have occurred, symbols are used in the tables to indicate the nature of the change. The explanatory notes on the following page should be used as a guide in interpreting the tables.

Population data for a specific municipality can be located by referring to the county, region or district in which the municipality is located. The municipalities are grouped by status under cities, towns, villages and townships, and arranged alphabetically.

This document was prepared by Research and Special Studies, Community Planning Branch, Department of Municipal Affairs. The co-operation of the Ontario Statistical Centre is gratefully acknowledged.

August 1969.

EXPLANATORY NOTES

The Census of Canada population figures and Department of Municipal Affairs assessed population figures are not strictly comparable. At the two points of comparison, 1961 and 1966, DBS figures will be higher than those for DMA, as they reflect total population as against DMA assessed population. The latter excludes persons in institutions, defense establishments and Indian Reserves.

Where there has been a change in the status of a municipality or in the municipal boundary, the nature of the change is indicated by one of the following letter symbols, located beside the population figure:

- A Amalgamation
- B Annexation to
- C Annexation from
- D New municipality or change in status
- E Dissolution
- F Renaming
- G Other or a combination of several changes
- H Prior to incorporation or reduction

In some cases there may appear to be a discrepancy between DBS and DMA indications of boundary change or change in municipal status. This is because DMA information is

based on the Municipal Directory, which lists the status of each municipality for the year in which the Directory is published but gives population statistics for the previous year.

For example, Metropolitan Toronto was reorganised, effective January 1, 1967. The 1967 Municipal Directory lists the reorganised municipalities, so 1966 population is shown in terms of city and boroughs. This obviously differs from the Census which gives the population of the towns, villages and townships as they existed when the Census was taken, in 1966.

Where municipal boundaries change soon after a Census year, the DMA figures will reflect the new boundaries for several years before DBS population figures reflect the change. For example, a municipality created in 1968 would be listed in the 1968 Municipal Directory with a 1967 population figure which represents the population of the particular area that was later incorporated. The symbol H beside the population figure would indicate that the area in question was not a legal corporation that year. The new municipality would not appear under DBS listings until the next Census year, 1971.
